

MediaCentral 2.8.6

Introduction

MediaCentral integrates all media into a single application and transforms your Mac into a home theater or information center. The media-center solution from equinux supports all important audio and video formats, IP TV, movies, DVD, IP radio, music, games, pictures and Skype. In addition, it is compatible with over 20 TV receivers.

Changes in this Version

- Fixed an issue that prevented some users from activating MediaCentral

System Requirements

- Apple Macintosh G4 1 GHz or Intel Mac
- Mac OS X 10.4 or higher
- An active internet connection
- iPhoto 5 or higher (to use iPhoto integration)
