

SongGenie 1.2.1

Introduction

Untitled and incorrect music titles in your iTunes library are now history. SongGenie analyzes, identifies and completes your music library. Using an acoustic fingerprint of each track and, based on specific characteristics, SongGenie determines which track to work on and intuitively inserts the correct information in its user interface. With just a click, the appropriate artist name, song title and album title are transferred to the track in question.

Changes in this Version

- The search box will no longer lose focus as soon as search results start to appear
- Fixed an issue that could cause minimized windows not to open whilst switching applications
- Additional Snow Leopard Core Graphics improvements

System Requirements

- Mac OS X 10.5 Leopard
- PowerPC G4 or Intel Mac
- Internet connection
